

Telephone Call Recording & Document Management Fixed Price Smooth Start Offering - Advanced

Capture your Companies Telephone Calls & Business Information with IBM Content Manager

Many organisations face the dilemma of determining when it might be prudent to capture telephone conversations and other business documents. And, increasingly, those organisations, and the regulatory bodies that oversee their industries, are concluding that it could prove too expensive not to do anything.

IBM and Integritie would like to bring to you our Call Recording and Document Management Smooth Start offering. An ideal way to kick start the inevitable process of capturing and managing your companies telephone conversations and customer business records.

Questions and issues your company may need to address:

- o Does your industry regulator require you to capture and archive telephone conversations or other business record capture such as images and PC files for audit or compliance needs?
- o If so, does your regulator stipulate a minimum retention period for your telephone calls and other business data and records?
- o What level of legal and commercial risk does unrecorded voice transactions and lost business records present to your organisation?

This out of the box Telephone Call Recording & Document Management smooth start offering includes:

Capturing and Recording
your companies telephone conversations and other business records such as images, PC files, and emails.

Indexing and Archiving
recorded telephone calls and other business files into central client files.

Instant Access and Retrieval
of your customers captured telephone conversation and other business records from a central repository. 'First time, every time'.

An end to end comprehensive solution, that can grow from a few users to hundreds of users.

Very Scaleable!

'Fixed Price' \$60,000

Plus Expenses - Quote Ref:CMCR02USA

No Hidden Costs!

Telephone Call Recording & Document Management Fixed Price Smooth Start Offering - Advanced

Advancements in telephone call recording and IBM Document Management technology enables the easy and fast capture and retrieval of telephone calls and business files, providing significantly improved real time customer service, query resolution, and reduced business costs.

- Telephone calls and business records such as letters, images, invoices etc can be quickly captured and retrieved from your index business rules, such as by customer name, date, phone number, call comments, length of calls, company names etc. This fixes a serious issue, no longer losing important call files, improving audit readiness, and reduced staff costs relating to IT and Admin Retrieval Staff manually locating historic telephone call recordings and business records.
- Companies can now partly or totally record telephone conversations, this can be done manually or automatically, capturing archiving and retrieving relevant parts of a call, providing significant cost savings from reduced storage, backup, and retrieval advancements.
- This fixed price solution provides a user intuitive drag and drop index and archive feature to easily, quickly, and accurately archive any digitised PC file. The index help and verification feature improves user indexing accuracy of documents into IBM's Document Management archive.
- This SmoothStart offering provides a simple and easy 'future path' to move from old telephone call recording and document management solutions, providing one consolidated Corporate Archive, which can include the consolidation of your old telephone call archives and any digitised business records.

We provide an end to end Telephone Call Recording and Document Management Solution for the fixed price of \$60,000
