Knowledge Capture Collaboration Like 'Drop Box'

The Knowledge Capture® Online (KC Online) Collaboration module offers 'drop-box' like functionality to share, collaborate and manage documents within the Cloud.

Users can easily create, manage, distribute and archive documents in line with business processes and policies. The KC Online Collaboration module is designed to enable teams of people to securely work together on a document and share content, such as developing new marketing materials or legal documents.

The KC Online Collaboration solution provides:

- Drag and drop of documents into KC Online
- Capturing of documents from Android and Apple devices into KC Online
- Life cycle management of documents from creation to long term archive
- Secure distribution of documents to people with the correct access rights
- Check in and check out with full version control
- Automated email notification as documents are added

- Optional Records Management capability for retention and final destruction.

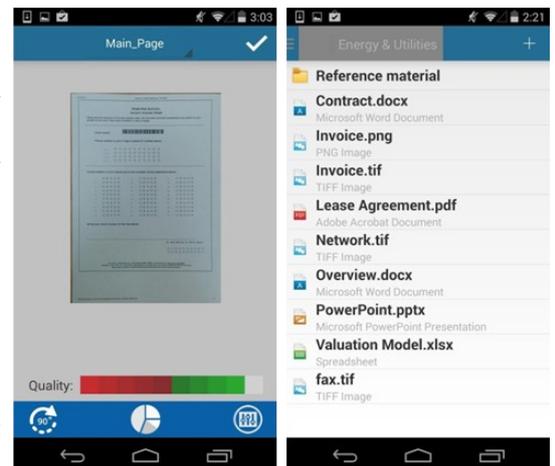

KC Online is a totally secure image, social media and content service, which enables consolidated access to authorised documents by only the people who have the right security access levels.

KC Online Collaboration offers all of the additional benefits:

- No more email attachments or zip files, users can view or download the latest version in seconds.
- Shared folders enabling people to work together on the same projects and documents.
- Invite colleagues to your folder. It will be as if you saved the folder to their computers.
- See other people's changes instantly.
- Control permissions to shared folders and links and lets you restrict members from sharing

outside your team.

- Any file saved to KC Online collaboration also instantly saves to your computers, phones, and the KC Online website.
- Files are always available from the secure KC Online website.
- KC Online Collaboration is totally secure, is always available, any changes can be undone and files can be undeleted. KC Online Collaboration archives your documents to keep a historic record of files., so you can retrieve at any time.

Social Media SMC4 Geo-Location Tracking

SMC4 geo-location tracking enables law enforcement agencies to search publicly posted social media traffic from Twitter, Facebook, LinkedIn and Instagram.

SMC4 geo-location tracking can be customised for specific geographical search areas, by circling the area, isolating and identifying all social media users within the search area, and record dates, times and locations of any message sent from any particular user and from any mobile device. Data collected can be used in finding key witnesses, leads and solving crimes.

Key Benefits of SMC4 Geo-Location Tracking

- Set geographical search parameters and search any social media traffic

- Isolate social media users
- Set date and time parameters
- Plot individual user traffic
- Archive social messages

Social media messages are tracked in real time, ensuring that all posts are collected, viewed and archived before the posts can

be deleted. Messages are viewed in a dashboard in order of risk priority and notifications are sent to the administrator for appropriate action to be taken.

Archiving these social media messages is critical in creating a chain of custody, and these messages can be used as evidence in court.

KC Online Extends Accounts Payable Module

Integritie announce extended functionality to our KC Online Accounts Payable module. The comprehensive extended function is called KC Online Active Pay.

The KC Online Active Pay module is designed to address complex AP needs from the standpoint of the employees involved in the review and approval of invoices and executives needing access to information. KC Online Active Pay is flexible to manage any AP process, and it provides custom configuration without changing the underlying software code.

KC Online Active Pay enables organisations to gain greater control over their AP functions and improves access to information, reduces manual work and improves workflow and validation functions. KC Online Active Pay provides strong and flexible functionality to automate invoice management and AP processes, eliminating labour intensive functions needed to manually receive, review, research, route, and access invoice information, which can lead to human errors, noncompliance, inefficient workflows and excessive costs.

The KC Online Active Pay AP module provides the following functionality to

automate the invoice management and accounts payable process:

- Invoice and document capture and scanning
- Configurable AP workflow & validations
- Automation of pre-match & reviews and approvals
- Email notifications & exception routing
- Built-in tracking and search
- ERP integration to key AP systems

By automating the AP process with KC Online Active Pay, invoices and supporting documentation are handled in an efficient and timely manner with fewer resources and better oversight. Finance professionals have visibility to a complete audit trail of the approval of an invoice and access to real-time information to improve decision making on vendor payments.

The business benefits of using the KC Online Active Pay solution are:

- reduced processing time, errors, manual work and costs
- improved maintenance and access to vendor information (ERP / accounting systems)

- improved visibility into AP liabilities at any point in time

- improved decision making around vendor payments and discounts

- reduced paper handling, routing costs, and document storage costs

- increased employee productivity

- improved access and control of information

- Reduced costs and potential penalties in complying with audits and financial reviews

- Improved process analysis and real-time reporting capabilities (accruals, trends)

The KC Online Cloud combines the benefits of cloud computing including lower overhead and no infrastructure or deployment costs, while providing enterprise-grade security and compliance.

KC Online ECM applications are available in private and hybrid cloud deployment models ranging from managed hosting services to SaaS.

For a small monthly price increase, existing KC Online customers can upgrade to KC Online Active Pay.

Vote NO to Cyber Bullying

To help schools and police tackle cyber bullying, Integritie have implemented a 'vote no to cyber bullying' button, where schools, police, parents and other community groups can join and show support for ending cyber bullying.

If you would like to show your support for ending cyber bullying, then please register here: <http://www.smcapture.com/ending-cyberbullying>

Students are able to self-onboard with their school using this button. Students are able to log onto the school's website and choose to sign up for SMC4 Observer, for it to observe their social media sites to help keep them safe from online abuse.

For more information on SMC4 Observer, please visit: www.smcapture.com/observer

Interview with Dean Oxley, SMC4 Product Manager

Dean Oxley is the SMC4 Product Manager at Integritie.

Overview of your past working history:

Dean has over 5 years experience of Project Management and is a Prince 2 Practitioner. During his time as a Project Manager he was exposed to the world of software Pre Sales. Dean started working for UK BACs software house, where he project managed software installation and customisation, whilst backing up the Sales team with pre sales support.

Overview of Integritie by Dean

I joined Integritie in 2012, and was part of the Integritie pre sales team until recently, when I was prompted to SMC4 Product Manager in March 2014. During my time at Integritie I have seen the company dramatically grow and develop from a Professional Services orientated organisation to a cloud based software house where Integritie develop their KC Online, ACM and SMC4 product suite, making Integritie a very exciting place to work, where no day is ever like another.

My SMC4 Product Manager role is to capture and represent customer SMC4 needs, to help develop market awareness of SMC4 and to help in sales support of SMC4.

Question Section

1) What has been a highlight for you, so far, with working for Integritie?

My Integritie career highlight is two fold, firstly my promotion to SMC4 Product Manager and secondly working on the bid to secure the UK Government KC Online service, capturing over 45 million HR files.

2) When you were a child, what did you want to be?

I always wanted to be a Paramedic or Fireman as I always liked the idea of driving big trucks with flashing lights! I'm not quite sure how my career went so far off track... but it has all worked out for the best, leading me in a very exciting direction.

3) In the future, what can you see yourself doing?

I would someday like to run my own specialised sports shop, serving the local community through junior and senior sports team sponsorship. I would specialise in equipment that the major retailers do not stock in store.

4) What is an interesting fact about yourself?

I recently completed the RAAM (Race Across America) as crew in July 2014, where a team of 12 (2 cyclist and 10 crew) started in Oceanside, California and cycled to Annapolis, Maryland, Washington DC. THAT IS 3020 MILES!!!! This event only took 6 days, 20 hours and 25 minutes and we are now the GB record holders for the challenge.

5) If you could invite any 3 people to a dinner with yourself, who would you pick and why?

Well, this a tough one..... but it would have be Martin Johnson former England Rugby Captain just to speak to speak him about winning in New Zealand with 13 men and lifting the Webb Ellis trophy in the beaten finalist back yard in 2011. Lance Armstrong to find out was living the lie worth it now everything has become publicised. Finally, Elisha Cuthbert, need I say any more.
